AVINASH PARAB

avinashparab170799@gmail.com | Vadodara(India) | +91-7990985830 | LinkedIn | GitHub | Portfolio | Leetcode

Skills

- Programming Languages: Python, C#, SQL, HTML, CSS
- Frameworks & Libraries: Flask, Pandas, OpenCV, GSAP
- Databases: PostgreSQL, MySQL
- Cloud & Tools: Azure, Git, GitHub, Power BI, Excel, Google sheet (App script)
- Core Concepts: Automation, Backend Development, REST APIs, Scalable Systems, Data Processing, Debugging, Process Optimization

CurrentlyLearning: Data Structures & Algorithms, System Design, Leetcode (275+ Problems Solved and continue...)

Experience

Numerator

Custom Group Associate – Data Quality & Taxonomy

India (Remote)
August 2025 - Present

- Perform **product data classification, taxonomy tagging,** and attribute validation, analyzing product descriptions, categories, brands, and item types to create accurate and consistent custom groups.
- Apply **query-based product identification** and data quality checks to identify missing, inconsistent, or incorrectly classified attributes and improve taxonomy consistency.
- Previously handled **raw data validation, logic checks, QC, and reporting, maintaining 95%+** delivery accuracy across projects.
- Developed Python and Google Apps Script automations for project tracking, queue management, and workflow updates, reducing a repetitive tracking process from **2 hours to 20 minutes (~83% reduction)** and improving workflow efficiency by ~40%.
- Built **centralized dashboards and Slack-based** workflow automation for project status and coordination, reducing manual tracker updates by approximately 60%; **received Star Performer and Spot Awards for automation initiatives.**

Baroda Global Shared Service Ltd (Bank of Baroda Subsidiary)

Vadodara-India
April 2024 - August 2025

Senior Executive

- **Payment Data Analysis:** Leveraged Python (Pandas, NumPy) to analyze and visualize **large volumes of transaction data**, enabling insights that improved reconciliation processes and reduced delays by 20%.
- **Cross-Functional Collaboration:** Coordinated with payment aggregators (Razorpay, CCAvenue,Airpay,etc) and internal tech teams to streamline integration process, achieving 95% on-time project completion.
- **Automation & Process Optimization:** Automated repetitive Excel-based reporting tasks using Python scripts, resulting in a 35% reduction in manual effort and boosting data accuracy by 45%.
- **Operational Risk Mitigation:** Identified inconsistencies in payment systems and proactively resolved data mismatches, contributing to a 15% reduction in financial errors.
- **Project Ownership:** Managed end-to-end execution of integration projects across mobile apps and websites, improving transaction throughput by 25%.

TATA CONSULTANCY SERVICES

Gandhinagar, India
March 2022 - August 2023

Assistant system Engineer
Python Developer

Nissan – FOTA (Firmware Over The Air) Project

- Core member of a 800+ global team working on **automotive backend systems.** Focused on **.NET-based microservices** integrated with **PostgreSQL and Azure Cloud**. Handled backend modules for **ECU communication** and over-the-air updates. Achieved **20% improvement** in service response time through code optimization.

Mitsubishi – Real-Time Dashboard Project (**Python, Pandas, OpenCV**)

- Supported development of a live dashboard that **detected objects like trees, cows, and pedestrians** around the vehicle.
- **Used Pandas and OpenCV** for real-time object detection and data processing.
- Gained hands-on exposure to real-time video analytics in automotive domain.

Education

Bachelor of Engineering in Electronics & Communication (7.18 CGPA) — **Bharuch-India**
Government Engineering College(GTU) — ***2017-2021***

Projects

- Festivus – Festival Reminder CLI Tool:Published on PyPI; a Python CLI tool to fetch Indian festivals by date or month using argparse and setuptools. | Link
- YouTube Video Downloader: Built with Tkinter and pytube; enables users to download videos in various resolutions via an intuitive GUI. | Link
- Color Code Generator from Image: Uses OpenCV and KMeans to extract dominant colors from images and returns HEX/RGB codes for design use. | Link

CERTIFICATIONS & AWARDS

- Numerator Star performer award (May month for automation) 2026
- Numerator Spot award (December month for automation) 2025
- Microsoft Certified: Azure Fundamentals (Az-900) || Microsoft 2022
- Microsoft Certified: Azure Data Fundamentals (DP-900) ||Microsoft 2022
- All Certifications obtained during tenure at TATA ConsultancyServices 2022-2023
